DETAILED ACTION

RESTRICTION REQUIREMENT

1.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 3, drawn to stabilized aluminum/zirconium/glycine salt, classified in class 423, subclass 412+.
- II. Claims 4-9, drawn to various antiperspirant/ deodorant products, classified in class 424, subclass 065+.

2.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a basic zinc carbonate antiperspirant or deodorant active.

3.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4.

A telephone call was made to Rosemary Miano on January 17, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

5.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
